

# Invoice On Behalf Of (IOBO)

Bill as your brand

Faster, cleaner cash flow

You keep the relationship

## The challenge

Invoicing, payment chasing, and reconciliations drain sales and finance time—especially across currencies, tax regimes, and payment methods. AR work drags sales and finance into manual follow-ups, disputes, and credit notes—while risking inconsistency in brand experience.

## The solution

**1-2-Taste IOBO** runs your Accounts Receivable end-to-end—in your name. We generate branded invoices, manage payments, and remit funds to you on a clear schedule.

- **Personalised invoicing:** Your logo, address, and required legal footers.
- **Cash application & reconciliation:** Match payments to invoices, partials, adjustments; credit notes and refunds handled.
- **Buyer references & terms:** PO/reference fields, Incoterms, payment terms & due dates printed.

## The outcome

By partnering with 1-2-Taste, B2B food ingredient sellers can:

01

### Shorter time-to-cash:

Cleaner billing and proactive reminders accelerate payment.

02

### Lower AR workload:

Invoicing, follow-ups, and reconciliation off your team's plate.

03

### Better buyer experience:

Consistent, branded documents and flexible payment options.

## Conclusion

Keep customer ownership while offloading AR complexity. With IOBO, your buyers receive your invoices, you get predictable payouts and clean books, and your team focuses on growth—not collections.
