

Cash flow protection

Guaranteed
payout

Credit risk off
your books

Predictable
cash flow

The challenge

Late payments and credit risk strain working capital and distract teams from core accounts. Manual credit vetting, invoicing, reminders, and collections add overhead — and make it harder to extend terms to new or smaller buyers.

The solution

1-2-Taste cash flow protection sits between you and the buyer so you can ship without payment anxiety. You fulfill the order; we take care of the rest.

- **Payment guarantee:** You ship; your payout is secured on a clear, predefined timeline.
- **Credit checks & limits:** We assess buyers, set credit limits, and manage terms on your behalf.
- **Automated AR operations:** Invoicing, reminders, and collections handled end-to-end by us.

The outcome

By partnering with 1-2-Taste, B2B food ingredient sellers can:

01

Stronger cash position:

Reliable payout timing improves planning and inventory turns.

02

Lower bad-debt exposure:

We take on credit risk and manage collections.

03

Reduced overhead:

Sales and finance spend less time on AR and more on growth.

Conclusion

Cash flow protection turns post-shipment uncertainty into **predictable, on-schedule payouts**. With credit checks, risk, invoicing, and collections handled by 1-2-Taste, you preserve working capital and let sales and finance focus on growth—not AR.
